Summary

The CRD, to which the Group remains subject as a consequence of the UK CRDIII implementing Regulations, have three pillars; Pillar 1 deals with minimum capital requirements; Pillar 2 deals with Internal Capital Adequacy Assessment Process ("ICAAP") undertaken by a Group and the Supervisory Review and Evaluation Process through which the Group and Regulator satisfy themselves on the adequacy of capital held by the Group

in relation to the risks it faces and; Pillar 3 which deals with public disclosure of risk management policies, capital resources and capital requirements.

The regulatory aim of the disclosure is to improve market discipline.

The Group is a MiFID Investment Management Group. It acts solely as agent, so the main protection to our customers is provided through client money and asset arrangements. The Group's greatest risks have been identified as business and operational risk. The Group is required to disclose its risk management objectives and policies for each separate category of risk which include the strategies and processes to manage those risks; the structure and organisation of the relevant risk management function or other appropriate arrangement; the scope and nature of risk reporting and measurement systems; and the policies for hedging and mitigating risk, and the strategies and processes for monitoring the continuing effectiveness of hedges.

The Group has assessed business and operational risks in its ICAAP and set out appropriate actions to manage them.

A number of key operations are outsourced by our clients to third party providers such as administrators reducing our exposure to operational risk. The Group has an operational risk framework (described below) in place to mitigate operational risk. The Group's main exposure to credit risk is the risk that management and performance fees cannot be collected and, therefore, credit risk is considered low. The Group holds all cash and performance fee balances with banks assigned high credit ratings.

Market Risk exposure has been assessed by the Group and is limited to the Group's exposure to foreign currency exchange rate risk and hence to any assets held on the Group's Balance Sheet denominated in a foreign currency. The Groups Reporting Currency is GBP and all foreign currency assets are converted into GBP on a regular basis.

BIPRU 3 (Credit Risk)

For its Pillar 1 regulatory capital calculation of Credit Risk, under the credit risk capital component the Group has adopted the Standardised approach ([BIPRU 3.4](#)) and the Simplified method of calculating risk weights ([BIPRU 3.5](#)).

Overall Pillar 2 Rule

The Group has adopted the “Structured” approach to the calculation of its ICAAP Capital Resources Requirement.

The ICAAP assessment is drafted by the Financial and Compliance Officer and reviewed by external consultants.

The Firm has adopted the “Structured” approach to the calculation of its Pillar 2 Minimum Capital Requirement as outlined in the Committee of European Banking Supervisors Paper, 27 March 2006 which takes the higher of Pillar 1 and 2 as the ICAAP capital requirement. It has assessed Business Risks by modelling the effect on its capital planning forecasts and assessed Operational Risk by considering if Pillar 2 capital is required taking into account the adequacy of its mitigation.

Since the Firm's Internal Capital Adequacy Assessment Process (ICAAP or Pillar 2) process has not identified capital to be held over and above the Pillar 1 requirement, the capital resources detailed above are considered adequate to continue to finance the Firm over the next year. No additional capital injections are considered necessary and the Firm expects to continue to be profitable.
